

Efficient & Effective Screening System "D-Screen"

● Purpose

- Sorting various wastes including high moisture and highly adhesive materials.

● Overview

- Highly accurate sorting is made possible by combining special shaped discs.
- Automatic cleaning system keeps the particles from being stuck between the discs.
- It is particularly effective for separating waste with high moisture content and highly adhesives such as compost, incineration ash, sludge.

● Features

- Suitable for adhesive material.
- Compact design, high throughput.
- Almost no clogging & tangling.
- High level of sorting accuracy.
- Quiet, reduced vibration level.
