

# Suction Sorter "V Selector" (Patented)

## ● Purpose

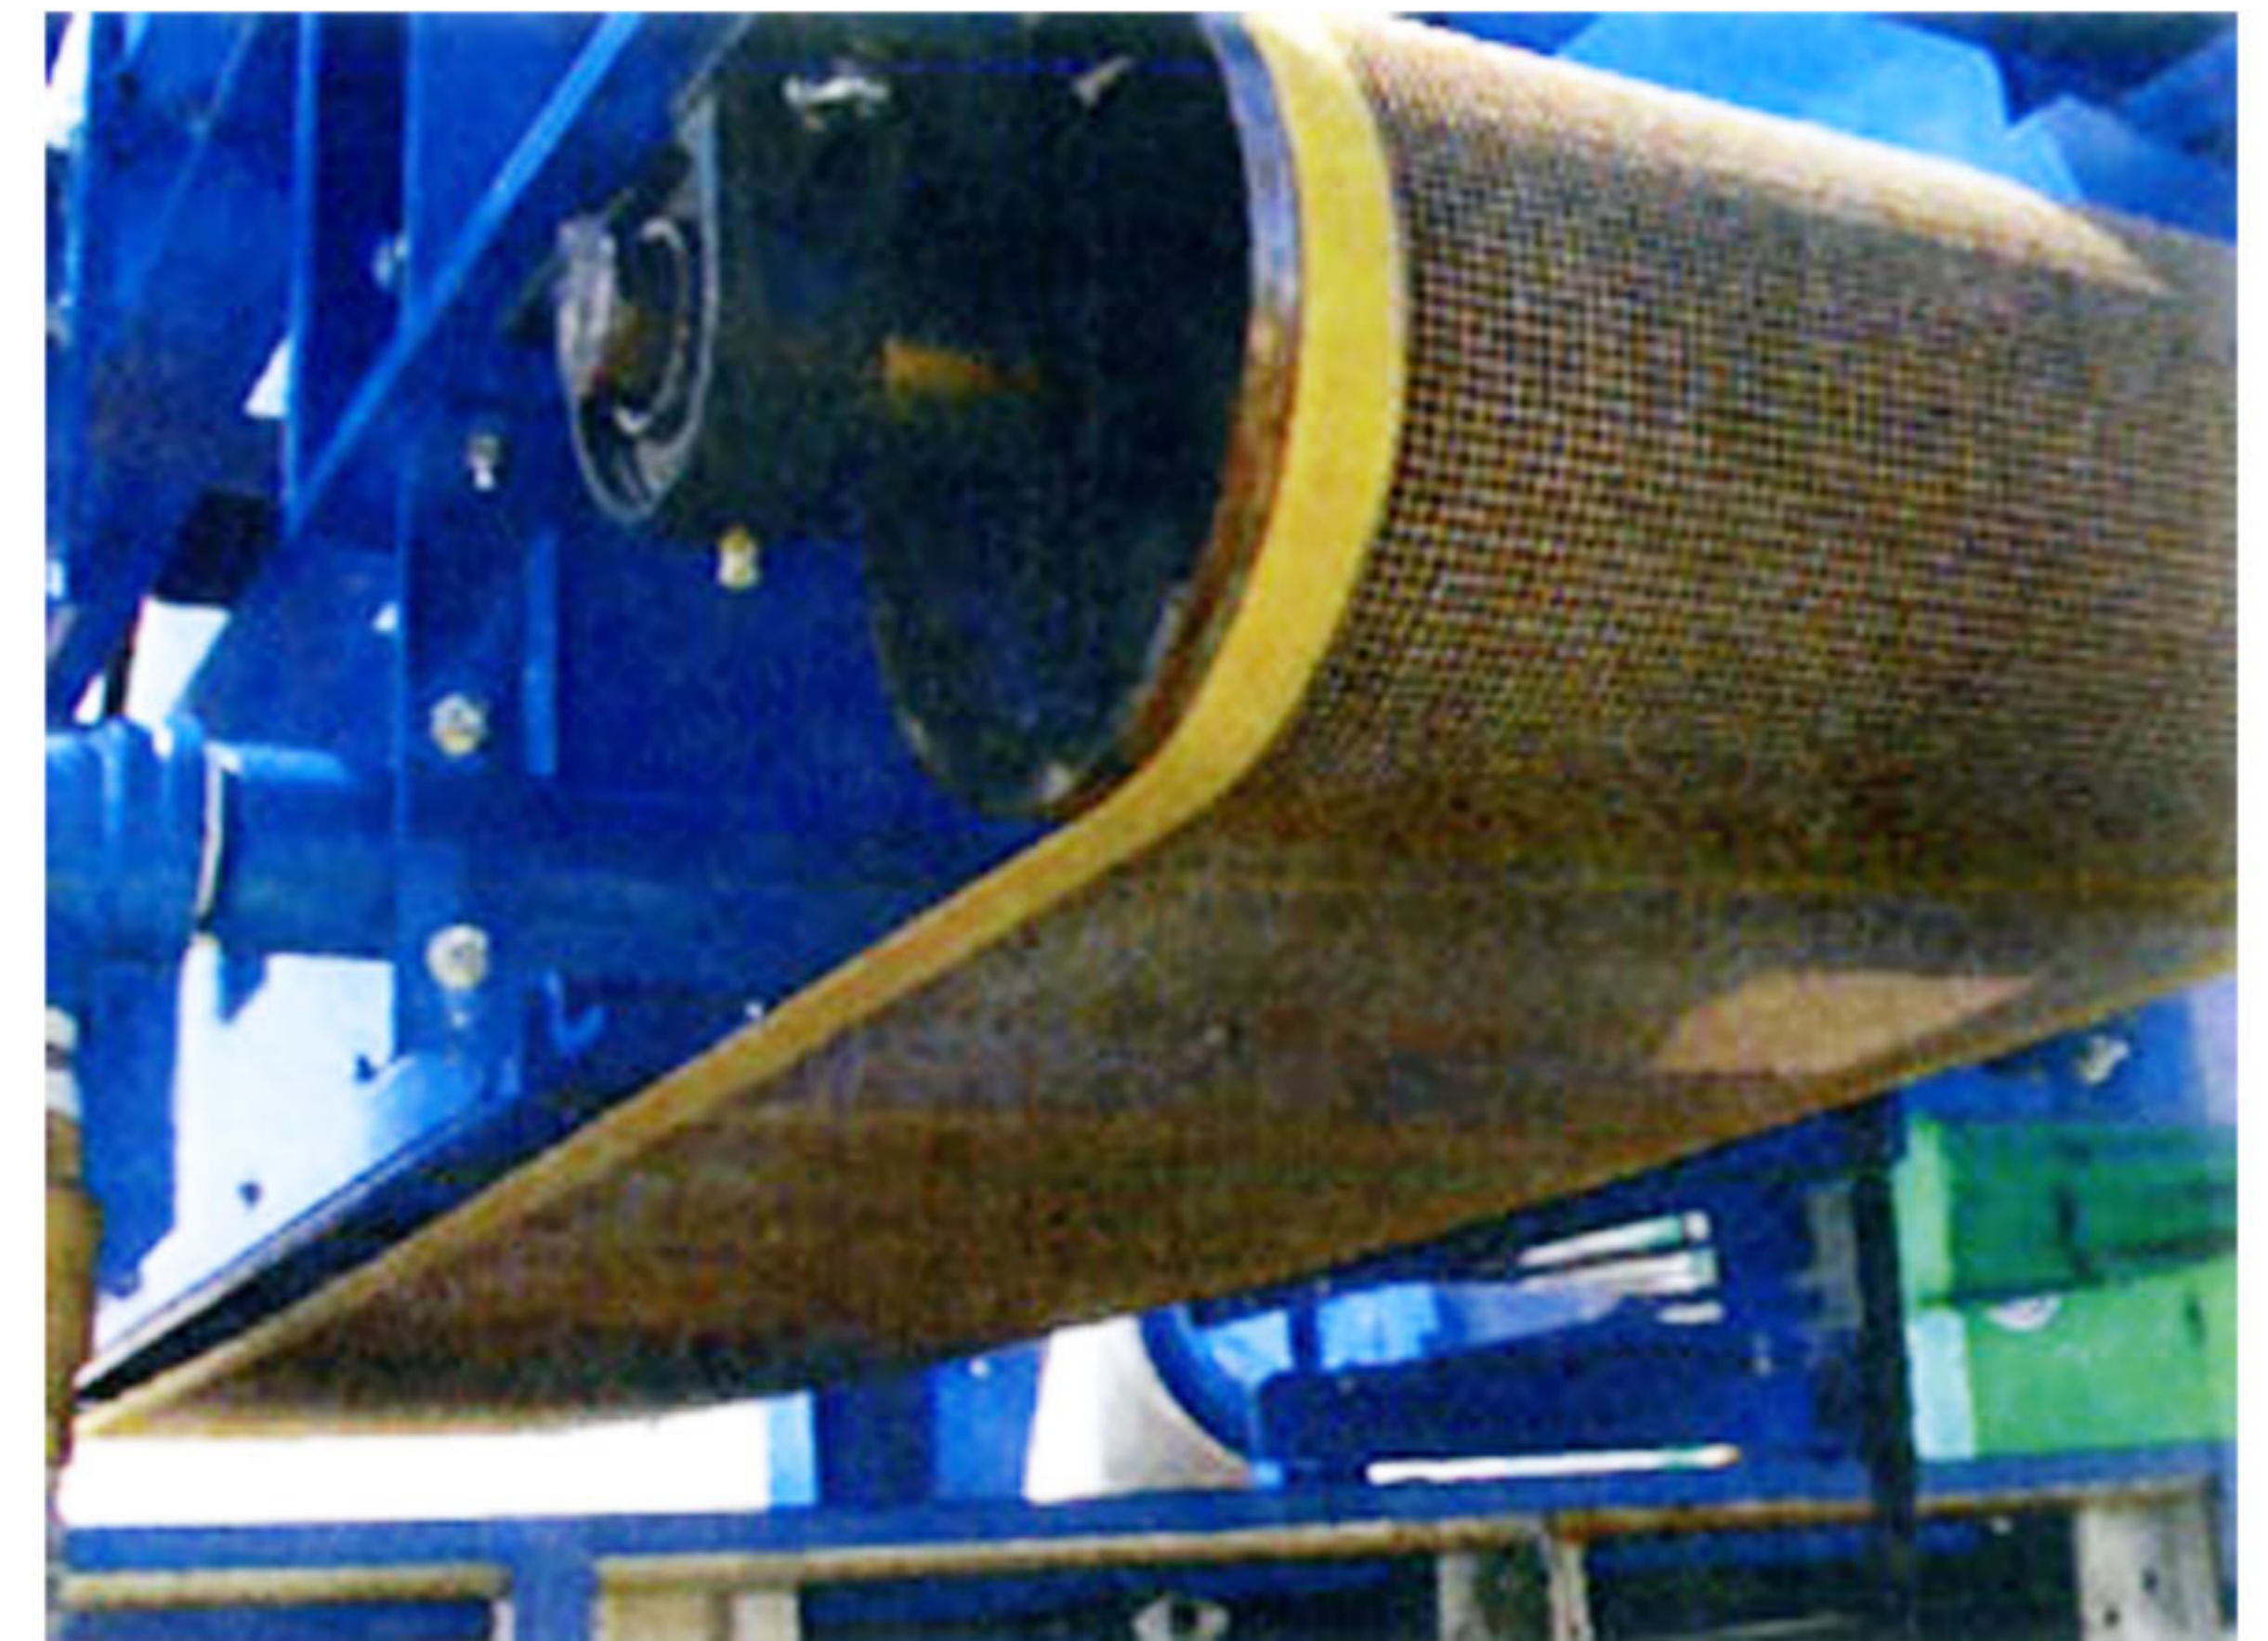

- Automatic sorting and collection of lights from mixed waste.

## ● Overview

- As with the magnetic separator, it is a system that collects light fraction from mixed waste.
- Film-type plastics, paper and other similar items are sorted automatically.

## ● Features

- It can be installed on existing conveyors.
- It is effective for RPF materials.
- Reduces the labor cost.
- Collects on a net conveyor and discharges continuously.
- Adjustable suction level.

## Sorting Process

Miscellaneous waste placed on the conveyor.

Collects target material on the conveyor by suction air.

"Overs" with paper & film type plastic removed.

Collected items in a container.

Blowing off the collected item at the end of net conveyor.
